

## Nature in Spring

I look at the clouds in the sky,  
I see the migratory birds fly.  
The hot sun is very bright,  
the flowers blooming are a pretty sight.  
No snow to be found,  
sparrows chirping are the only sound.  
Buzzing bees are swarming the town,  
frogs and toads are wetland bound.  
The bare trees are budding lively,  
animals are giving birth willingly.  
Nature in Spring is a wonderful thing!
