The goal of this project is to answer the following research questions:

1. How do our current Cooperating Teachers and Field Supervisors support the core values of the Single Subject Teacher Education program and the program’s outcomes, with special attention to outcomes #4, #5, #6, #7, #8, #12, and #13?
2. How can we better support current and new Cooperating Teachers and Field Supervisors in adhering to the core values of the program and its outcomes?

The project, ultimately, is conceived as a process to provide greater certainty that what our student teachers observe and practice in their Field Placements are consistent with the outcome development that occurs across all courses in the Single Subject Program. In short, the project will further develop existing learning outcomes such that there is a closer connection and consistency among on-campus classroom development of teaching knowledge, skills, and dispositions with student field experience and to develop ways for full-time faculty to participate more fully in successfully developing and monitoring quality field experiences for all of our students.
