Greg Merrill

The Master of Science in Accounting is a new program that was launched in July, 2013. The first round of assessments is planned for AY 2014-2015. At this point in time there is no assessment plan, although one option has been discussed. There is a set of program learning goals and objectives. In addition there are course learning outcomes for each of the ten (10) courses in the program.

We are requesting funding to:
1) develop an assessment plan
2) develop assessment instruments
3) develop assessment rubrics
4) train artifact reviewers
5) print/photocopy instruments for administration
6) administer, evaluate, document assessment
7) purchase supplies.

The faculty in the program will meet to determine the best approach to assessing the achievement of the program learning goals in the spring of 2014. There are currently two (2) broad models available, separate embedded assessments for each program learning goal, or a single embedded comprehensive program assessment exam. The decision as to which model to be used will be made during the spring.
